Miglen Evlogiev

CISO @ Evrotrust | President @ Cybersecurity Association |
OWASP Sofia Lead
Sofia, Sofia City, Bulgaria

Summary

CyberSecurity leader with over a decade of experience driving security innovation across cloud, fintech, and enterprise environments. As the first engineer to build AWS Managed Security capability, I helped shape how one of the world's largest cloud providers responds to threats at scale.

Currently, I serve as CISO at Evrotrust and President of the Bulgarian Cybersecurity Association, where I focus on advancing national cyber resilience and fostering collaboration between public and private sectors.

I'm passionate about growing the Bulgarian cybersecurity community. I co-organized and supported many events like OWASP Sofia, BSides Sofia, CyberSecurityTalks and XAKEP.bg - the largest online cyber community in Bulgaria.

Over the years, I've reviewed hundreds of security products, interviewed and hired thousands of professionals, and lectured at universities and conferences across Europe. My work spans finance, fintech, utilities, communications, automotive, and government sectors.

While I'm happily employed, I'm open to security mentoring and consulting opportunities. Feel free to reach out if you'd like to connect on tech, career paths, or shared interests. All views expressed here are my own.

Experience

Evrotrust
CISO
March 2025 - Present (1 year)
Sofia, Bulgaria

Leading the information security, compliance, and platform team. Driving the strategy that protects the digital identity and trust-service ecosystem, ensuring alignment with eIDAS and global standards while enabling secure growth and innovation.
